| TITLE | Assessment of Efficacy and Safety in Cosmetics: Regulatory Framework and New Approach Methodologies |
| Main Lecturer | Matteo Zanotti Russo, Anastasiia Kharina, Giulia De Negri Atanasio |
| Duration and Credits | 2 CFU |
| Course description | The course "Assessment of Efficacy and Safety in Cosmetics: Regulatory Framework and New Approach Methodologies" provides a comprehensive exploration of the regulatory landscape governing cosmetics. Participants delve into the intricate frameworks that ensure the efficacy and safety of cosmetic products. The curriculum emphasizes innovative methodologies, keeping abreast of the latest advancements in assessment techniques. Topics include novel approaches to evaluating product safety and effectiveness, aligning with evolving industry standards and regulatory requirements. Through lectures and practical exercises, attendees gain a deep understanding of compliance measures, allowing them to navigate the complex regulatory environment. This course equips professionals in the cosmetic industry with the knowledge and tools to conduct assessments using modern methodologies, fostering a commitment to product quality and consumer safety. |
