Course offered for the STAT PhD program

TITLE	Management
Main Lecturer	Matteo Zanotti Russo,
Duration and Credits	2 CFU
Course description	The "Management" course offers a comprehensive study of fundamental principles and advanced strategies essential for effective organizational leadership. Participants explore various aspects of management, including planning, organizing, leading, and controlling. The curriculum delves into topics such as strategic management, decision-making, organizational behavior, and human resource management. Through case studies, discussions, and real-world examples, students develop critical thinking skills and practical insights into managerial roles and responsibilities. Emphasis is placed on fostering leadership qualities, communication skills, and the ability to adapt to dynamic business environments. By the end of the course, participants gain the knowledge and confidence to navigate complex management challenges, drive organizational success, and inspire teams to achieve their full potential.
Course organization	Frontal lessons
Teaching period	Novembre 2024 -maggio 2025.
